***Reasons for Allowance***

1. Claims 1-18 are allowed as the prior art does not teach or suggest the applicant's invention. Independent claim 1 teaches a storage device. The distinguishing elements of the claim are: a position determination unit that determines whether the detected position of the recording and reproducing head reaches a first predetermined position in operations of loading or unloading the recording and reproducing head, wherein the speed control unit comprises one of a bandwidth switching unit that switches a bandwidth of the feedback control to a wide bandwidth based on a result of the position determination, and a feed-forward compensation unit that adds a predetermined feed-forward control variable to a control variable of the feed-back control based on the result of the position determination.

Independent claim 16 teaches a method of controlling movement of an actuator. The distinguishing elements of the claim are: switching a bandwidth of the feedback control to a wide bandwidth or adding a predetermined feed-forward control variable to a control variable of the feed-back control based on the result of the position determination.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mitchell R. Slavitt whose telephone number is (571) 272-7562. The examiner can normally be reached on M-F (6:30-4:00), 2nd Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David R. Hudspeth can be reached on (571) 272-7843.
